

TECNA[®]

Resistance Welding Systems & Balancers

Overhead Cable Management for HPC Depots

Ergonomic cable management system for overhead High-Power Charging infrastructures
Intuitive design with manual pull-out and controlled low-speed retraction

Link to Supports up to 500 A CCS cables

sklep-pneumatyczny.pl

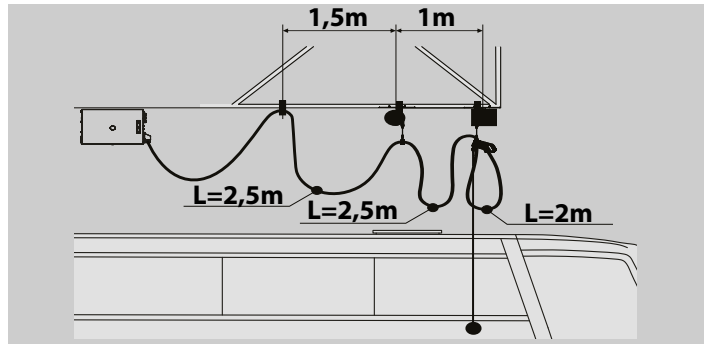

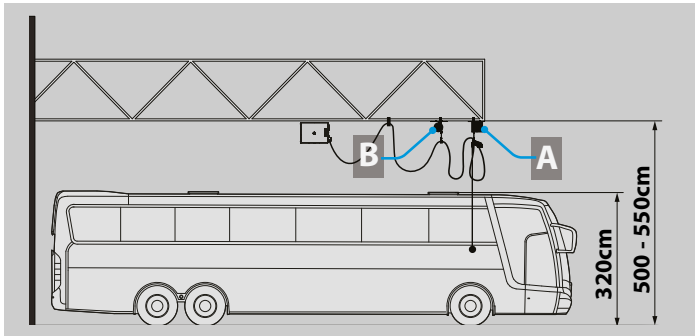

**Ergonomic cable management systems
for overhead High-Power Charging
infrastructures**

**Intuitive design with manual pull-out and
controlled low-speed retraction
Supports up to 500 A CCS cables**

The space-saving solution for eBus & eTruck depots

Safety. Efficiency. Reliability

Technical data

A

A

Main Balancer (97020D):

Max Stroke: 5 m (16.40 ft)
 Rope: Synthetic fiber
 Specifications use: Indoor and Outdoor
 Operating Temperatures: -40 °C to +60 °C (-40 °F to +140 °F)
 Pull Locking System: Yes
 Rewind System: Progressive braking with controlled low-speed retraction
 Force Characteristic: Progressive over the stroke
 Pre-set pull force: Adjustable
 Supported charging cable length: Up to 9.5 m (31.2 ft)
 Max Pull Force (up to 500 A): $8 \div 12 \text{ kg}$ ($17.63 \div 26.46 \text{ lbs}$) (from minimum to maximum value)
 Fall protection systems: CE standards

B

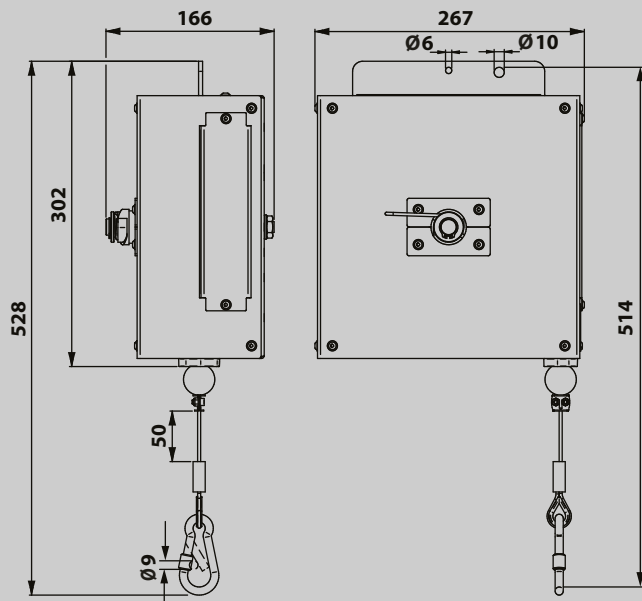

B

Auxiliary Balancer (*93370D/3) (**93380D/3):

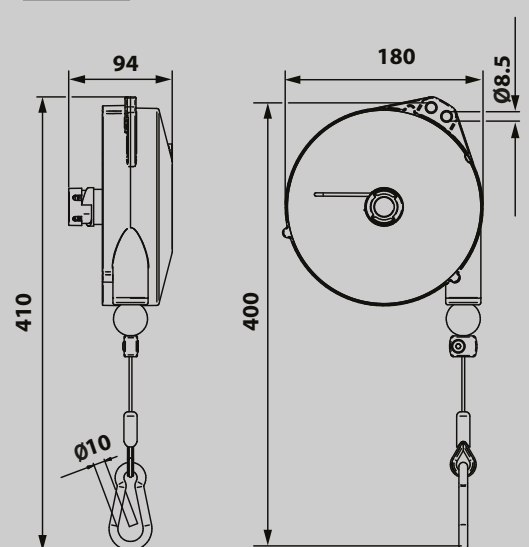

Max Stroke: 3 m (9.84 ft)
 Rope: Synthetic fiber
 Specifications use: Indoor and Outdoor
 Operating Temperatures: -40 °C to +60 °C (-40 °F to +140 °F)
 Pull Locking System: No
 Force Characteristic: Progressive over the stroke
 Pre-set pull force: Adjustable
 Auxiliary supported charging cable length: Up to 9.5 m (31.2 ft)
 *Max Pull Force (up to 380 A): $4 \div 6 \text{ kg}$ ($8.82 \div 13.23 \text{ lbs}$) (from minimum to maximum value)
 **Max Pull Force (400 A & 500 A): $6 \div 8 \text{ kg}$ ($13.23 \div 17.63 \text{ lbs}$) (from minimum to maximum value)
 Fall protection systems: CE standards
